Career Objective

Computer Science graduate specializing in Data Science with strong programming, data analysis, and problem-solving skills. Seeking an opportunity to apply technical expertise in software development and data-driven solutions to contribute to innovative and efficient systems.

Technical Skills

Programming	Python, C++, C, Java
Data Analysis	SQL (MySQL, Oracle), Data Validation, Dataset Analysis, Data Querying
Web	MERN Stack, HTML, CSS, JavaScript
Tools	Git, GitHub, Microsoft Office, Google Workspace
Other	Data Documentation, Analytical Thinking, Process Compliance, Problem Solving

Relevant Experience & Projects

Multimodal Image-to-Text Human Emotion Analysis [Report] [Kaggle Notebook]

- Developed a multimodal sentiment analysis model to classify social media content (positive, neutral, negative) using both images and captions.
- Collected and prepared a dataset of 5,000+ image–text pairs from platforms such as Twitter, Instagram, and Facebook.
- Implemented preprocessing, data augmentation, and tokenization using Python libraries including PyTorch and Hugging Face Transformers.
- Trained and evaluated the model using accuracy, precision, recall, and F1-score on cloud platforms such as Google Colab and Kaggle.

TaskMaster — Full-Stack Task Management App [GitHub]

- Built a full-stack task management application using the MERN stack (MongoDB, Express, React, Node.js) with JWT-based authentication and persistent sessions.
- Implemented features including drag-and-drop task reordering, category filtering, due dates, and real-time search across task states.
- Designed a responsive, minimalist UI with Tailwind CSS supporting dark mode, daily goal progress tracking, and streak statistics.
- Secured REST API endpoints with middleware-based JWT verification, scoping all task operations to the authenticated user.

Education

BSc in Computer Science & Engineering *(Major: Data Science)*
East West University

Additional Strengths

- Strong attention to detail when handling structured data
- Ability to analyze datasets and identify inconsistencies
- Competitive programming background improving logical thinking and problem-solving ability
