

Dewan Sultan Al Amin

Business Analyst — Data & Operations — Process Improvement

+880 1410-207587 — dwnsultan@gmail.com — Rbn-Rmn
dewansultan — dewansultan.vercel.app — D_Sultan01

Career Objective

Computer Science graduate with strong analytical, documentation, and English communication skills. Eager to contribute as a Business Analyst at Alpine Infotech, supporting data analysis, workflow monitoring, process improvement, and cross-departmental coordination in a BPO environment serving the U.S. real estate and mortgage industry.

Education

BSc in Computer Science & Engineering (<i>Major: Data Science</i>)	2024
<i>East West University</i>	
Higher Secondary Certificate (<i>Science</i>)	2018
<i>Mohammadpur Government College</i>	

Technical Skills

Data & Reporting	Microsoft Excel, Google Sheets, SQL (MySQL, Oracle), Data Validation, Reporting & Analytics
Business Analysis	Operational Data Analysis, Process Mapping, Gap Analysis, Documentation, Record Keeping
Communication	Strong written & spoken English, Stakeholder Coordination, Cross-team Collaboration
Tools & Practices	Git, Jira/Confluence (familiar), Microsoft Office Suite, Agile/Scrum Basics
Development	Python, MERN Stack, Kotlin (Android), REST API Integration

Relevant Experience & Projects

TaskMaster — Full-Stack Task Management Application [GitHub]
- Analyzed operational workflows and defined business rules for a full task lifecycle (create, assign, track, complete) — directly applicable to workflow monitoring and task completion tracking. - Maintained structured documentation of system requirements, user journeys, and process logic; identified inefficiencies and implemented improvements across development cycles. - Conducted User Acceptance Testing (UAT) simulation, validated outputs against requirements, and ensured accurate record-keeping throughout.
ZeroMiss — Android Productivity Application [GitHub]
- Designed end-to-end workflows for 5 modules; gathered, documented, and maintained accurate functional requirements and acceptance criteria. - Identified process gaps and edge cases; collaborated across design and development to ensure smooth implementation and task completion. - Integrated real-time APIs and implemented business logic — supporting research, analysis, and operational support tasks.
Multimodal Image-to-Text Human Emotion Analysis [Report] [Kaggle Notebook]
- Analyzed and explored operational datasets; prepared detailed reports on model performance using structured metrics (precision, recall, F1-score). - Documented findings, identified data gaps, and supported management with research analysis and actionable recommendations.

Additional Strengths

- Strong analytical and documentation skills; experienced in preparing reports, monitoring workflows, and identifying process improvement opportunities.
- Excellent written and spoken English; able to coordinate across teams and support management with research and data-driven insights.
- Quick learner with strong attention to detail; comfortable in fast-paced, target-driven BPO environments.
